

BETTER BATHROOMS & KITCHENS

FIT FOR A KING

LUXURIOUS HIGH-QUALITY PRODUCTS

This opulent en suite was designed by the experienced director of Better Bathrooms & Kitchens, Garrett Hebden. With an abundance of high-quality features, this project truly stands out from the crowd. The clients wanted a luxurious and highly functional space that would offer everyday convenience.

Featuring a soaring stained-glass arched window, the en suite has a palatial atmosphere. The window illuminates the 3m x 3m space with natural light while also providing privacy. The extensive use of Carrara marble combines with the selection of high-quality products to achieve an opulent aesthetic.

A Hawthorn Hill double-basin stand with glass shelves makes the space practical for multiple occupants. The sinks are fitted with Perrin & Rowe three-hole mixers with matching levers, which are cohesive with the surrounding regal details. Positioned for optimal functionality, the two custom-built cabinets provide abundant storage space.

A pendant chandelier and a Hawthorn Hill towel warmer add to the en suite's luxurious aesthetic. Wall-mounted lights above the basin provide effective illumination, while a Thermatouch 4.3dC dual-control under-tile heating system keeps the space comfortable all year round.

With a bright colour palette, the en suite feels spacious and welcoming. A large mirror was installed on the door to increase the illusion of space, which is further enhanced by the mirror-backed open cabinetry, two Perrin & Rowe hexagonal mirrors and a frameless glass showerscreen.

The spacious shower features a waterfall and a handheld showerhead for added functionality. Wall-recessed shelves provide easy-access storage while maintaining the streamlined appeal of the marble walls. An elegant towel rail is strategically positioned on the glass showerscreen for ease of use.

A registered builder with almost 30 years of kitchen and bathroom renovation experience, Garrett Hebden is the head of the design and project management team at Better Bathrooms & Kitchens. Completing approximately 50 renovation projects each year, the expert team is capable of handling all internal renovation works, including the removal and addition of walls, floors, ceilings, windows and doors.

Specialising in bathroom and kitchen renovation projects, Better Bathrooms & Kitchens can create custom designs to meet your exact specifications. Taking your project from concept right through to completion, the company works within strict deadlines to meet agreed-upon timeline dates.

Better Bathrooms & Kitchens' dedicated team of highly professional tradespeople takes great pride in its work and achieves the results it promises. With a Housing Industry Association (HIA) membership, Better Bathrooms & Kitchens is committed to delivering quality workmanship, every time.
