

BETTER BATHROOMS & KITCHENS

A NATURAL LIGHT-FILLED SPACE

HIGH-END BATHROOM DESIGN

This bathroom was designed by Garrett Hebden, the owner and director at Better Bathrooms & Kitchens, and is an excellent example of the company's high-end renovation skills.

Focusing on a warm colour palette, the bathroom features natural tones and clean finishes that combine to create a space that is both modern and luxurious. The spacious design also features high-quality products, including a heated towel rail and LED downlights.

The company installed a Caroma Newbury 1800 island bath, designed for two, and an open shower panel to ensure the bathing area is spacious and functional, while the four-door glass shaving cabinet provides extra storage.

Extensive structural work had to be undertaken before Better Bathrooms & Kitchens could begin re-designing the dated bathroom area. The existing bathroom entry door, dividing hall wall and existing cabinetry were all removed to open up the new bathroom space and make the new layout possible.

The window from the original bathroom was also replaced with a new highlight window as shown, providing an abundance of natural light that perfectly complements the bathroom's LED downlights.

Once the new window was installed, Better Bathrooms & Kitchens completed the project in a stylish fashion, ensuring the new weather boards covered the old bathroom window and perfectly matched the existing boards. The final product proves once again that Better Bathrooms & Kitchens really does know bathrooms.
